PRE-DAY AGENDA

WEDNESDAY, MAY 1st

PUBLIC LUNCH & INVITE-ONLY DINNER AND TOPICS DISCUSSION

We are happy to extend invitations to select family offices, Investment Advisors, Individual Investors, and those asset managers and service providers who are both in CAASA membership and sponsors of the event.

The pre-day sessions will include a choice of lunch and dinner discussions which will set the tone for the following day's panels and content as well as provide, we believe, a more intimate environment where peers and competitors can speak to pertinent issues. Both will be at a site other than the summit, to be communicated to attendees prior to the date.

The **Liquid Alts Lunch** will bring together Canadian bank-owned and independent mutual fund companies, Canadian and foreign alternatives asset managers, Investment Advisors, product approval professionals from bank-owned and independent broker-dealers, tax and securities lawyers, prime brokers, fund administrators, audit and compliance professionals, third party marketers, and other service providers and consultants. The Lunch will feature an overview of the legislation, how it has been received/used by industry participants, and areas of improvement and excellence as 2019 progresses.

Our **Family Office Dinner & Discussion** features topics important to family offices. We believe that this more intimate environment will allow participants to speak freely amongst their peers and provide insight into how family offices view the world of investment while balancing such areas as: philanthropy and impact investing; operational issues including staffing, taxation, trade and deal structuring, bookkeeping & infrastructure; and investments (asset mixes, volatility, concentrated bets, seeding managers, using alternative investments in a portfolio setting).

The Family Office Dinner & Discussion will include representatives from: Canadian and foreign single family and multi-family offices, alternative asset managers, tax and securities lawyers, and other service providers and consultants.

We also offer a **Blockchain Primer** for all conference attendees. This session runs mid-day on May 1 and is designed to give a broad overview of distributed ledger technology, blockchain and its applications, and crypto-assets (including crypto-currencies).

GETTING THE MOST OUT OF YOUR TIME

The CAASA Family Office Summit is designed to provide ample, diverse opportunities for investors, managers, and service providers to meet, communicate, and collaborate.

Our **Pre-Day Sessions** provide three different formats to learn and engage. The Blockchain Primer will feature a selection of experts in each sub-area of blockchain and crypto-assets - so that attendees can have their questions answered in a concise and informative way. The Liquid Alts Lunch has a panel format and discussions between attendees on their views of the new legislation is encouraged. Our Family Office Dinner & Discussion was created to allow the free flow of information and views from peers and select industry participants - discussing areas that matter to family offices.

Our **Conference Day** has three distinct formats. We have a morning of panels consisting of family office professionals and select service providers - in the areas of investment due diligence, operational due diligence, and best practices for family offices. Then an afternoon of discussions focused on investment management segments (equity strategies, credit strategies, private lending, and illiquids such as private equity, real estate, and infrastructure), led by a family office person and consisting of managers proficient in each area. The focus of these seven panels is education of the audience in each of the areas.

Our third format is tête-à-tête sessions within the break and meal times. Investors, managers, and service providers can schedule meetings with any delegate they like, subject to their approving the meeting. This allows dedicated time when these parties can set aside time to have an introduction meeting or further discussion. Our web portal and mobile app will be available for profile population, meeting invites, and other messaging prior to, during, and after the conference date. Participants are encouraged to make use of this technology, as we do not distribute attendee contact details to other delegates, including to speakers and sponsors.

ABOUT CAASA

INCLUSIVE, ACTIVE, AND PAN-ALTERNATIVE

The Canadian Association of Alternative Strategies & Assets (CAASA) was created in response to industry requests for a national group to represent the Canadian alternative investment participants, including investors, asset managers, and service providers. CAASA is **inclusive** in that it welcomes participation from all companies active in the space as well as select individuals (those with investors) who might want to participate in committees and working groups - or simply attend member events - without their employer being a member of the association. CAASA is very **active** in both committees & groups and events: 45+ events, including this conference, have occurred or are planned in 2019. **Pan-alternative**, for CAASA, encompasses all alternative strategies and assets including: hedge funds / alternative trading strategies, private and public real estate (funds and direct), private lending, private equity, development & project finance, digital assets / crypto-assets, weather derivatives & cat bonds, and all aspects of diligence, trading, structuring, dealing, and monitoring alternatives in a stand-alone portfolio and as part of a larger investment strategy.

MEMBER BENEFITS

Investors join CAASA to be a part of a formal network of pension plans, foundations, endowments, sovereign wealth funds, and family offices to discuss ideas, strategies, and operational issues particular to their businesses - all within a closed group where managers and service providers may or may not be included, depending on the forum.

Managers see the association as a way to connect with peers, investors, and service providers to speak to fund structuring, sales & marketing, and regulatory issues. CAASA is not a capital introduction platform, but we do create forums where investors and managers can meet organically or via structured meeting sessions, such as at this conference, where participation by the investors is strictly opt-in.

Service providers participate in our events and working groups as well as assist in the production of thought leadership pieces which provide relevant information to both association members and the industry and investing public at large.

NATIONAL AND GLOBAL

CAASA believes that the Canadian alternatives industry has a great deal to offer Canadians and the global community. The *Canadian Model of Pension Management* is well-known for its large alternatives focus, managed in-house in many cases with substantial allocations to external managers as well. Canadian investment managers operate in a robust regulatory regime (of hedge fund managers) that is becoming the norm across the globe and a stable banking back-drop that provides solace for investors as well as opportunities for managers. Talent in investment management (approximately 10% of all CFA charterholders reside in Canada) as well as newer areas such as digital assets and robo-advisory services are a differentiator. Of course, Canadian investors and managers are keen to learn of best practices in operations and portfolio management from their global peers.
